Precision Medicine: One Size Does Not Fit All

March 2, 2018

9:00 AM - 3:00 PM

Sharonville Convention Center

Precision Medicine is an “emerging approach for disease treatment and prevention that takes into account individual variability in genes, environment, and lifestyle for each person. This approach will allow doctors and researchers to predict more accurately which treatment and prevention strategies for a particular disease will work in which groups of people. It is in contrast to a one-size-fits-all approach, in which disease treatment and prevention strategies are developed for the average person, with less consideration for the differences between individuals” (NIH, 2017).

Join us to learn more about this exciting approach to care!

Speakers

THOMAS HERZOG, MD
Deputy Director, University of Cincinnati
Cancer Institute, Professor, Obstetrics and
Gynecology, University of Cincinnati
College of Medicine.

CYNTHIA A. PROWS,
MSN, APRN, CNS, FAAN
Genetics Clinical Nurse Specialist,
Division of Human Genetics,
Cincinnati Children’s Hospital
Medicine Center

ARMAND AN TOMMARI A,
MD, PHD, FAAP
Director, Ethics Center, Lee Ault Carter
Chair of Pediatric Ethics, Division of
Hospital Medicine, Cincinnati Children’s
Hospital Medical Center, Associate
Professor, University of Cincinnati
Department of Pediatrics

LISA MARTIN, PHD
Professor, University of Cincinnati,
Department of Pediatrics, Division of
Human Genetics, Cincinnati Children’s
Hospital Medical Center

COST (includes lunch)

\$75 STTI members

\$85 Non-members

Registration will be online and available in January, link to follow.
